Investment policy

The aim of the Fund is to grow investment through a combination of income and capital growth over the medium to long term (5 or more years) and to keep the fund within a designated risk profile. This Fund is one of a range of Embark Horizon Multi-Asset funds which aims to cater for investors with different risk appetites.

The Fund will be invested in collective investment schemes. Investments in collective investment schemes may also include those managed, operated or advised by the Management Company's associates.

Through investment in collective investment schemes, the Fund will be indirectly invested in a range of different asset classes. The weighting of the asset classes to which the Fund is exposed may be varied depending on the Investment Manager's (BlackRock) views in the context of achieving the investment objective. Under normal market circumstances, between 50% and 75% of the value of the Fund will be invested in global equities, including emerging market equities. The Fund will generally have a lower exposure to global fixed income securities (such as government, corporate, high yield and emerging market bonds) and there may be some indirect exposure (typically, no more than 15% in aggregate) to any one or more of: real estate and commodities. To the extent not fully invested in collective investment schemes, in normal market conditions, up to 10% may be invested directly in cash, near cash and money market instruments.

The Investment Manager may need to adjust the stated exposure level to global equities during periods of unusual instability in the markets. The Fund's risk level is managed by varying the weighting of the asset classes to which the Fund is exposed.

The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

The Fund is managed with reference to strategic asset allocations which are provided to the Investment Manager by EV, an independent Risk Profile Service Provider, on a quarterly basis. These may change as a result of changing market conditions and assumptions in the Risk Profile Service Provider's asset allocation models which aim to achieve an optimal level of growth in income and capital for the expected risk level assuming a medium to long term investment horizon. The Investment Manager will consider these asset allocation weightings when making active management decisions to decide on the composition of the investments of the Fund.

Income from investments in the Fund will be added to the value of your shares.

Investor profile

The Fund may be suitable for an investor seeking income and capital growth without a capital guarantee.

The Fund is suitable for an investor looking for a risk profile of 3.

Risk profile 3

This Fund is aligned to risk profile 3, the middle risk profile in this range, which means that it aims to deliver income and capital growth through assets that may demonstrate moderate to large price fluctuations with greater emphasis placed on equity and lower exposure to fixed income securities.

The EV risk profile 3 compared to other risk rating agencies is listed below.

EV ¹	Distribution Technology ²	FinaMetrica ³		Defaqto ⁴ Risk Rating
