Redemption Fee: 0%

* The OCF is calculated at the interim and final accounting period ends and is therefore updated every 6 months. It excludes portfolio transaction costs and research fees.

Investment policy

The aim of the Fund is to grow investment through a combination of income and capital growth over the medium to long term (5 or more years) and to keep the fund within a designated risk profile.

This Fund is one of a range of Embark Horizon Multi-Asset funds which aims to cater for investors with different risk appetites.

The Fund will be invested in collective investment schemes. Investments in collective investment schemes may also include those managed, operated or advised by the Management Company's associates.

Through the investment in collective investment schemes, the Fund will be indirectly invested in a range of different asset classes. The weighting of asset classes to which the Fund is exposed may be varied depending on the Investment Manager's (BlackRock) views in the context of achieving the investment objective. Under normal market circumstances, between 60% and 100% of the value of the Fund will be invested in global equities, including emerging market equities. The Fund may have some indirect exposure (typically, no more than 15% in aggregate) to any one or more of: real estate and commodities. To the extent not fully invested in collective investment schemes, in normal market conditions, up to 10% may be invested directly in cash, near cash and money market instruments.

The Investment Manager may need to adjust the stated exposure level to global equities during periods of unusual instability in the markets. The Fund's level of risk is managed by varying the weighting of the asset classes to which the Fund is exposed.

The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

The Fund is managed with reference to strategic asset allocations which are provided to the Investment Manager by EV, an independent Risk Profile Service Provider, on a quarterly basis. These may change as a result of changing market conditions and assumptions in the Risk Profile Service Provider's asset allocation models which aim to achieve an optimal level of growth in income and capital for the expected risk level assuming a medium to long term investment horizon. The Investment Manager will consider these asset allocation weightings when making active management decisions to decide on the composition of the investments of the Fund.

Income from investments in the Fund will be added to the value of your shares.

Investor profile

The Fund may be suitable for an investor seeking income and capital growth without a capital guarantee.

The Fund is suitable for an investor looking for a risk profile of 5.

Risk profile 5

This Fund is aligned to risk profile 5, the highest risk profile in this range, which means that aims to deliver income and capital growth through assets that may demonstrate large price fluctuations, with greatest exposure to equity.

The EV risk profile 5 compared to other risk rating agencies is listed below.

EV ¹	Distribution Technology ²	FinaMetrica ³		Defaqto ⁴ Risk Rating
		Growth Assets	Best Fit Risk Comfort Zone	
5	7	95%	77-100	8

¹ EV's 5 point scale as at 31/12/2023. ² Distribution Technology as at Q1 2024. ³ © FinaMetrica Pty Ltd. Risk tolerance scores were mapped to the funds' strategic asset allocations as at 30/09/2023. The mappings are only for use by financial advisers licensed to use FinaMetrica's risk profiling system and do not constitute financial advice. Financial advisers must satisfy themselves that the funds' current asset allocations reflect the risk/return expectations of the funds when mapped. Embark pays FinaMetrica for the mappings in the table. However these mappings are calculated independently by FinaMetrica.

⁴ Defaqto is a financial information business, helping financial institutions and consumers make better informed decisions. Data as at 18/03/2024.
