Embark Horizon Multi-Asset Fund II (the "Fund")

Class Z Net Accumulation Shares ISIN: GB00BTKH4B20

a sub-fund of Embark Investment Funds ICVC (the "Company")

Management Company: Embark Investments Limited, part of Lloyds Banking Group

Objectives and Investment Policy

The aim of the Fund is to grow investment through a combination of income and capital growth over the medium to long term (5 or more years) and to keep the fund within a designated risk profile. This Fund is one of a range of Embark Horizon Multi-Asset funds which aims to cater for investors with different risk appetites.

This Fund is aligned to risk profile 2, the second lowest risk profile in this range, which means that it aims to deliver income and capital growth through assets that demonstrate moderate price fluctuations, with emphasis placed on fixed income securities and equities. Risk profile 2 is not the same as the risk and reward indicator in the section below.

The Fund will be invested in collective investment schemes. Investments in collective investment schemes may also include those managed, operated or advised by the Management Company's associates.

Through the investment in collective investment schemes, the Fund will be indirectly invested in a range of different asset classes. The weighting of the asset classes to which the Fund is exposed may be varied depending on the Investment Manager's views in the context of achieving the investment objective. Under normal market circumstances, between 20% and 55% of the value of the Fund will be invested in global equities, including emerging market equities. The Fund will have exposure to global fixed income securities (such as government, corporate, high yield and emerging market bonds) and there may be some indirect exposure (typically, no more than 15% in aggregate) to any one or more of: real estate or commodities.

To the extent not fully invested in collective investment schemes, in normal market conditions, up to 10% may be invested directly in cash, near cash and money market instruments.

The Investment Manager may need to adjust the stated exposure level to global equities during periods of unusual instability in the markets. The Fund's risk level is managed by varying the weightings of the asset classes to which the Fund is exposed.

The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

EV (EValue Limited), an independent risk profile service provider, using the output from its investment research tools, produces a strategic weighting of asset classes aligned to the risk profile of the Fund based on a medium to long term time horizon. EV updates these weightings on a quarterly basis and the Investment Manager will consider the weightings when taking active management decisions to decide on the composition of the investments of the Fund.

Income from investments in the Fund will be added to the value of your shares.

You can buy and sell shares in the Fund on any day that is a business day in London.

Risk and Reward Profile

Historical data may not be a reliable indication for the future.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean 'risk free'.

The Fund is in risk and reward category 4 because its mix of investment in bonds, equities and property have shown in the past a medium level of volatility. Volatility describes how much the price of shares in the Fund goes up and down.

Your investment in the Fund is not guaranteed. Positive returns are not guaranteed and no form of capital guarantee or protection applies.

The risk and reward indicator is not the same as the risk profile of the fund in the section above.

The Fund's risk profile may limit the performance of the Fund.

You can find more information on risks under the "Risk Factors" section of the Prospectus.

The following are additional risks not covered by the Risk and Reward Indicator:

- **Credit Risk:** Bonds are affected by changes in interest rates, inflation and any decline in the credit worthiness of the issuer. It is possible that bond issuers will not pay the interest or return of capital promised.
- **Liquidity Risk:** The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.
- **Currency Risk:** The Fund invests in overseas equities. Currency fluctuations may affect the value of investments and the income from them.
